All visiting members of the Order are cordially invited to attend meetings of local lodges.

MARINE ENGINEERS' BENEFICIAL ASSOCIATION

HARMONY LODGE, No. 3, I. O. O. F.

Meets every Monday evening at 7:30 in I. O. O. F. Hall, Fort Street. E. R. HENDRY, Secretary. F. D. Wicke, N. G.

All visiting brothers very cordially invited.

OAHU LODGE, No. 1, K. of P.

Meets every first and third Friday evening at 7:30 in K. of P. Hall, corner Fort and Beretania. Visiting brothers cordially invited to attend. F. R. NUGENT, C. C. R. GOSLING, K. R. S.

HONOLULU LODGE 616, B. P. O. E.

Honolulu Lodge No. 616, B. P. O. E. Meets in their hall, on King Street, near Fort, every Friday evening. Visiting Brothers are cordially invited to attend. E. A. DOUTHITT, E. R. H. C. EASTON, Sec'y.

HAWAIIAN TRIBE, No. 1, I. O. R. M.

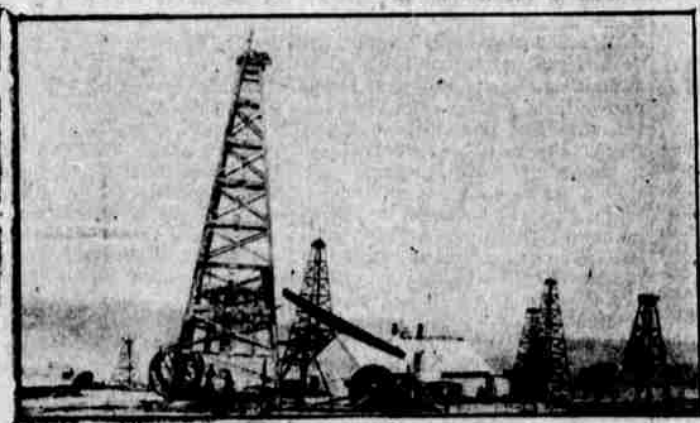

Meets every first and third Thursdays of each month at Knights of Pythias Hall. Visiting brothers cordially invited to attend. L. A. PERRY, Sachem. E. V. TODD, C. of R.

HONOLULU AERIE 140, F. O. E.

Meets on the 2nd and 4th WEDNESDAY evenings of each month at 7:30 o'clock in K. of P. Hall, corner Beretania and Fort streets. Visiting Eagles are invited to attend. W. M. MCCOY, W. Pres. H. T. MOORE, Secy.

Wm. M'KINLEY LODGE No. 8, K. of P.

Meets every 2nd and 4th Saturday evening at 7:30 o'clock in K. of P. Hall, corner Fort and Beretania. Visiting brothers cordially invited to attend. F. M. MCGREW, C. C. E. A. JACOBSON, K. R. S.

Oil now Leads all Mineral Productions in the State of California, Gold takes second place

Gold is in second place among the mineral productions of California. Petroleum takes the lead now by a substantial margin of \$6,000,000. Ten years ago California produced 2,000,000 barrels of oil. Last year it produced more than 48,000,000 barrels, a clear gain of 8,000,000 barrels over the product of 1907. The value of the 1908 product, in petroleum, is estimated by the state mineralogist at over \$28,000,000. At the present time at least one-half of the California listed oil stocks are paying dividends, and, as the price advances, so will dividends increase and stocks advance.

All investors should get in touch with this exceptionally profitable industry. Now is the time for investment in meritorious oil stocks such as we recommend. Ask for an oil book and market letter. Sent free upon request. Our representative in Honolulu, Mr. F. L. Kibler, is a member of the California Stock Exchange of San Francisco, and will be pleased to impart full information concerning the California oil business to those interested. Call on, or write him at the Alexander Young Hotel, Honolulu, Room 50. Lincoln Mortgage & Loan Co., 186 Geary Street, San Francisco.

At the Police Court this morning there were only a few cases and most of them were sent over to future dates.

The band will give a concert at the Capitol grounds tomorrow afternoon. Today the band will attend the reception at the Chinese consulate.

All accounts due Lewis & Co., Ltd., can be paid until January 31 at their old store, 189 King street. Those indebted will please settle before that time and oblige.

Ben Drew pleaded guilty of assault on a Chinese, and as he was shown to be a steady worker, Judge Andrade let him off with a suspended sentence of thirteen months.

A large store building will soon be under construction at the corner of Smith and Pauahi streets, the structure to cost in the neighborhood of five thousand dollars.

Jonah Cummings, a youth, was on the Police Court calendar charged with embezzling five dollars. Attorney Magoon, who appeared for the young man, asked for and was granted a remand till Wednesday next.

Robert S. Gault, who arrived on the Alameda yesterday, has been appointed superintendent of the Boys' Clubs of Honolulu. He will also act as secretary of the boys' department of the local Y. M. C. A.

New that Mr. Gault has arrived to take up active work among the various boys' clubs of this city, it is expected that there will be a merger of the boys' department of the Y. M. C. A. and the boys' clubs throughout the city.

The boys' clubs of this city own considerable property in buildings, equipment, and also a 5 acre field, abutting on Vineyard and Liliha streets. Most of this property is held in equity. This athletic field has not been in active use for the past two years, owing to the fact that there has been no regular instructor. Now that Mr. Gault has arrived to take up active work, it is the intention of the boys to enter heart and soul into all manner of outdoor sports.

There are four boys' clubs in operation in this city. These are affiliated and are known locally as the Boys' Club. In addition there are several private boys' clubs such as the Kaula Club, under the leadership of Mr. Theodore Richards, and the Oahu College students club, under the supervision of the faculty of that college. This latter is known as the Kaula Club. There are two other boys' clubs, which at present are independent, viz: the Palama Settlement, under the supervision of J. A. Rath, and the Kaili Settlement club under the direction of H. W. Chamberlain. The treasurer of these clubs is G. P. Castle, and they are maintained by voluntary subscriptions.

Mr. Gault was a resident of Richmond, Kansas, and received his appointment through the local Y. M. C. A. He was connected with boys' club work in Chicago, which was a separate organization, but working on the same lines as Y. M. C. A. work is conducted here in Honolulu. The original Chicago boys' club was situated in the slum district. The boys were from the very poorest and could ill afford to pay a fee of any kind. There were between 450 to 500 boy members of Mr. Gault's club. Ten nationalities were represented of which about 40 per cent were Italians.

For one year Mr. Gault had full charge of the athletic work in connection with this club. He assisted in the religious department, and through his instrumentality the club was soon in a flourishing condition. Mr. Gault was a student of Baker University, Kansas, for three years. He then entered the Moody Bible Institute in Chicago. It was at this institution that he began to interest himself in boys' work. Since his arrival here he has started in to get things into shape, and has already made the round of the various boys' clubs of this city.

A portion of his time will be devoted to the boys' department of the Y. M. C. A., the remainder to instruct-

ing the members of the various boys' clubs of this city in athletic exercises. Mr. Gault is an expert Indian club swinger. He has given exhibitions in Chicago and surrounding territory, Eastern Kansas and in Indiana. He was a member of the Moody Bible Institute baseball team; his position being center field. He was also chosen to represent the Baker University gymnastic team from 1904 to 1907.

There are between 400 and 450 members enrolled in the various boys' clubs in Honolulu, so that Mr. Gault will have his work cut out instructing the different aggregations. Athletic work is only one of the means of getting at the spiritual side of boys. It is hoped that these athletic exercises will be the means of inducing many of the boys to join the Y. M. C. A., where they will receive help and advice for their future welfare.

Building operations on the new laboratory for the Bernice P. Bishop Museum will start on Monday. The contract has been let to Lucas Brothers of this city. The building will be a reinforced concrete structure three stories in height, with a large photographic studio on the roof. The height of the entire building will be 54 feet.

A covered bridge will connect the three floors of this laboratory with the museum and these will be 35 feet long by 8 feet wide. The building will include a carpenter's shop, a paint room, a paper stock room, printer's room, separate rooms for birds and shells, a directors' room, a large room for insects, and separate rooms for geological and ethnological specimens.

The new laboratory has been planned on a large scale to meet the requirements not only of the present but to provide adequate space for the future. The ground floor will include a carpenter's shop 39 feet by 26 feet. This will be fitted with work benches, sinks and complete sets of tools. The east room, in which models of specimens will be made, will be 26 feet by 26 feet. The paper stock room will be 14 by 26 feet. A hallway will run through the center of this building and will be 80 feet in length by 10 feet in width.

Electric Lighted. An elevator, for the convenience of the employees and for freight purposes, will be installed and will run to the fourth story. The printer will take up nearly half of the ground floor space and will be 76 feet by 26 feet. Here all catalogues and reports will be printed and made into book form. In addition to the elevator, a main stairway 6 feet 6 inches wide will connect each floor.

All windows on the ground floor will be made of fire-proof wire glass, so that in the event of a fire the heat will not penetrate. On either side of the hallway will be cedar cases 8 feet high fitted with glass

fronts, in which all kinds of specimens will be kept. In the carpenter's shop will be a shower room and the usual offices.

All columns and girders will be of reinforced concrete. The exterior elevations have been divided into bays separated by pilasters. A pilaster is a right-angled columnar projection with capital and base from a pier or wall. These pilasters have been found necessary from a structural standpoint and are to be used for exterior treatment as well. In the facades straight simple lines predominate and ornaments are sparingly used. The design on the whole is "straight-forward" suitable to the structural medium and eminently suitable for its purpose.

The design of this building will eventually be carried out in the library and Papuan Hall which it is proposed to construct later, and which will connect with this laboratory and museum. A particular feature in the construction of this building is that none of the rooms will be marred by interior columns.

The building will be lighted throughout by electricity carried in steel conduits. Each room will be provided with an automatic telephone, connecting directly with the directors' room.

The second floor will consist of a marine zoology 26 feet by 39 feet; a taxidermy 39 feet by 26 feet where the art and process of preserving dead animals or parts of them, and especially in preparing and mounting the skins of animals in a lifelike manner will form one of the conspicuous rooms of this second story. In addition there will be an instrument room and a shell room each 14 feet by 26 feet, a directors' room 26 feet by 26 feet and a bird room 26 feet by 26 feet. A hallway will run through the center of this second story and will be fitted with cabinets for specimens similar to those in the ground floor hallway. All rooms throughout the entire building will be fitted with double doors.

The third floor will consist of a lunch room 32 feet by 26 feet, an insect room 14 feet by 26 feet, an ethnological department 26 feet by 26 feet, a geological department 14 feet by 26 feet, a store room 32 feet by 26 feet, a second taxidermy room 38 feet by 26 feet with a gallery around three sides 7 feet wide and 60 feet in length. Every room will be fitted with work benches, sinks and all necessary appliances for the successful handling of specimens.

The photographic studio on the roof will be 24 feet by 56 feet and will be fitted with the necessary side lights and skylights. The doors leading into each room throughout the entire building will be made of sugar pine. All cases for specimens will be of white cedar, as this wood is vermin proof.

The building is reinforced concrete throughout, therefore, absolutely fireproof. It is about 20 per cent less expensive to construct than a steel or brick fireproof building and at least 50 per cent cheaper to construct than a stone and steel building.

The contract calls for the completion of this laboratory within eight months and Lucas Brothers are confident that they can accomplish this well within that time limit. The foundations will be carried down to bed rock and the whole structure will be most substantial.

IN FOREIGN PORTS

Saturday, January 8.

MONTEREY—Sailed Jan. 7: S. S. Rosecrans, for Honolulu.

SAN FRANCISCO—Sailed Jan. 7: S. S. Misourian, for Seattle and Honolulu.

BOYS CLUB HEAD IS HERE

R. S. Gault Will Act As Superintendent of Athletics

Robert S. Gault, who arrived on the Alameda yesterday, has been appointed superintendent of the Boys' Clubs of Honolulu. He will also act as secretary of the boys' department of the local Y. M. C. A.

New that Mr. Gault has arrived to take up active work among the various boys' clubs of this city, it is expected that there will be a merger of the boys' department of the Y. M. C. A. and the boys' clubs throughout the city.

The boys' clubs of this city own considerable property in buildings, equipment, and also a 5 acre field, abutting on Vineyard and Liliha streets. Most of this property is held in equity. This athletic field has not been in active use for the past two years, owing to the fact that there has been no regular instructor. Now that Mr. Gault has arrived to take up active work, it is the intention of the boys to enter heart and soul into all manner of outdoor sports.

There are four boys' clubs in operation in this city. These are affiliated and are known locally as the Boys' Club. In addition there are several private boys' clubs such as the Kaula Club, under the leadership of Mr. Theodore Richards, and the Oahu College students club, under the supervision of the faculty of that college. This latter is known as the Kaula Club. There are two other boys' clubs, which at present are independent, viz: the Palama Settlement, under the supervision of J. A. Rath, and the Kaili Settlement club under the direction of H. W. Chamberlain. The treasurer of these clubs is G. P. Castle, and they are maintained by voluntary subscriptions.

Mr. Gault was a resident of Richmond, Kansas, and received his appointment through the local Y. M. C. A. He was connected with boys' club work in Chicago, which was a separate organization, but working on the same lines as Y. M. C. A. work is conducted here in Honolulu. The original Chicago boys' club was situated in the slum district. The boys were from the very poorest and could ill afford to pay a fee of any kind. There were between 450 to 500 boy members of Mr. Gault's club. Ten nationalities were represented of which about 40 per cent were Italians.

For one year Mr. Gault had full charge of the athletic work in connection with this club. He assisted in the religious department, and through his instrumentality the club was soon in a flourishing condition. Mr. Gault was a student of Baker University, Kansas, for three years. He then entered the Moody Bible Institute in Chicago. It was at this institution that he began to interest himself in boys' work. Since his arrival here he has started in to get things into shape, and has already made the round of the various boys' clubs of this city.

A portion of his time will be devoted to the boys' department of the Y. M. C. A., the remainder to instruct-

ing the members of the various boys' clubs of this city in athletic exercises. Mr. Gault is an expert Indian club swinger. He has given exhibitions in Chicago and surrounding territory, Eastern Kansas and in Indiana. He was a member of the Moody Bible Institute baseball team; his position being center field. He was also chosen to represent the Baker University gymnastic team from 1904 to 1907.

There are between 400 and 450 members enrolled in the various boys' clubs in Honolulu, so that Mr. Gault will have his work cut out instructing the different aggregations. Athletic work is only one of the means of getting at the spiritual side of boys. It is hoped that these athletic exercises will be the means of inducing many of the boys to join the Y. M. C. A., where they will receive help and advice for their future welfare.

Building operations on the new laboratory for the Bernice P. Bishop Museum will start on Monday. The contract has been let to Lucas Brothers of this city.
